

QUANTA

CARIBBEAN ECO-RESORT DESTINATION MARIPOSA

TAKES THE QUANTA NETWORKS ROUTE TOWARDS SUSTAINABILITY

A new eco-resort in Belize is positioning itself to be the most technologically advanced health and wellness complex in the Caribbean.

For Immediate Release

July 11th, 2020

Thanks to a ground-breaking commercial partnership with Canadian telecommunications firm Quanta Networks, the \$135 million dollar Destination Mariposa project – which includes two luxury hotels, private residences and eco-tourism amenities – will boast one of the most advanced communications infrastructures in the Caribbean. The Ontario-based company has been engaged to design, install and maintain a climate-proofed digital infrastructure across the 145-acre Caribbean resort.

Quanta's "facility-free network" will provide high speed connectivity to guests at Destination Mariposa without having cell towers and radio antennae disturbing the Belizean rainforest environment. In a part of the world where natural disasters and extreme weather can seriously disrupt traditional telecommunications services, this advanced infrastructure will provide the resorts' residents and visitors, with facility-free wireless communications at all times, under any circumstances.

Quanta Networks will reduce the resorts local environmental footprint by integrating smart monitors and sensors, while introducing an intelligent video and perimeter Intrusion security network. This will ensure the safety of residents, guests and the resorts ecologically sensitive surroundings, focusing on sustainability.

Humberto Varela, CEO at Quanta Networks said: "We are proud to be a major partner in this exciting project. There is a real need for climate-resilient technologies in the Caribbean and the robust infrastructure we're building at Destination Mariposa, will keep guests connected while enjoying their time in the rainforest. We look forward to the positive tourism impact that Destination Mariposa will have on this beautiful region of Cayo, and the country."

Wayne Thomas, CEO at Destination Mariposa said: "Destination Mariposa will be a 'one of a kind' lifestyle destination for people who are passionate about improving their lives through health and wellness. Surrounded by the beauty of the Belizean rainforest, the resort provides a

haven for people looking to connect with nature, while remaining connected to the outside world. We are grateful to Quanta Networks for their ground-breaking work to ensure the safety and comfort of our future guests.”

About Mariposa

The \$135 million Destination Mariposa project – which includes two luxury hotels, a full-service luxury spa, a high-end villa complex, adventure park, lagoon and fitness centre – will boast one of the most advanced communications and control infrastructures on the planet in the Caribbean, thanks to a ground-breaking commercial partnership with Canadian telecommunications firm Quanta Networks
